

# Smart & Innovative Technology Solutions

We design and manufacture intelligent systems that empower organizations to operate with greater efficiency, accuracy, and reliability across multiple industries.

## OUR PRODUCTS

# ABOUT COMPANY

Kemet Innovation Technologies is a leading manufacturer dedicated to developing smart, innovative technology solutions that empower organizations to operate with greater efficiency, accuracy, and reliability. Built on a foundation of engineering excellence and continuous innovation, we design and manufacture intelligent systems that serve diverse industries including education, healthcare, government, commercial facilities, transportation, and more.

## WHY CHOOSE US

### Engineering Excellence

Built with strong engineering principles to ensure accuracy, durability, and dependable performance.

### Smart & Innovative Solutions

Intelligent solutions designed to improve efficiency and simplify everyday operations.

### Industry-Focused Expertise

Proven solutions tailored for education, healthcare, government, and commercial environments.

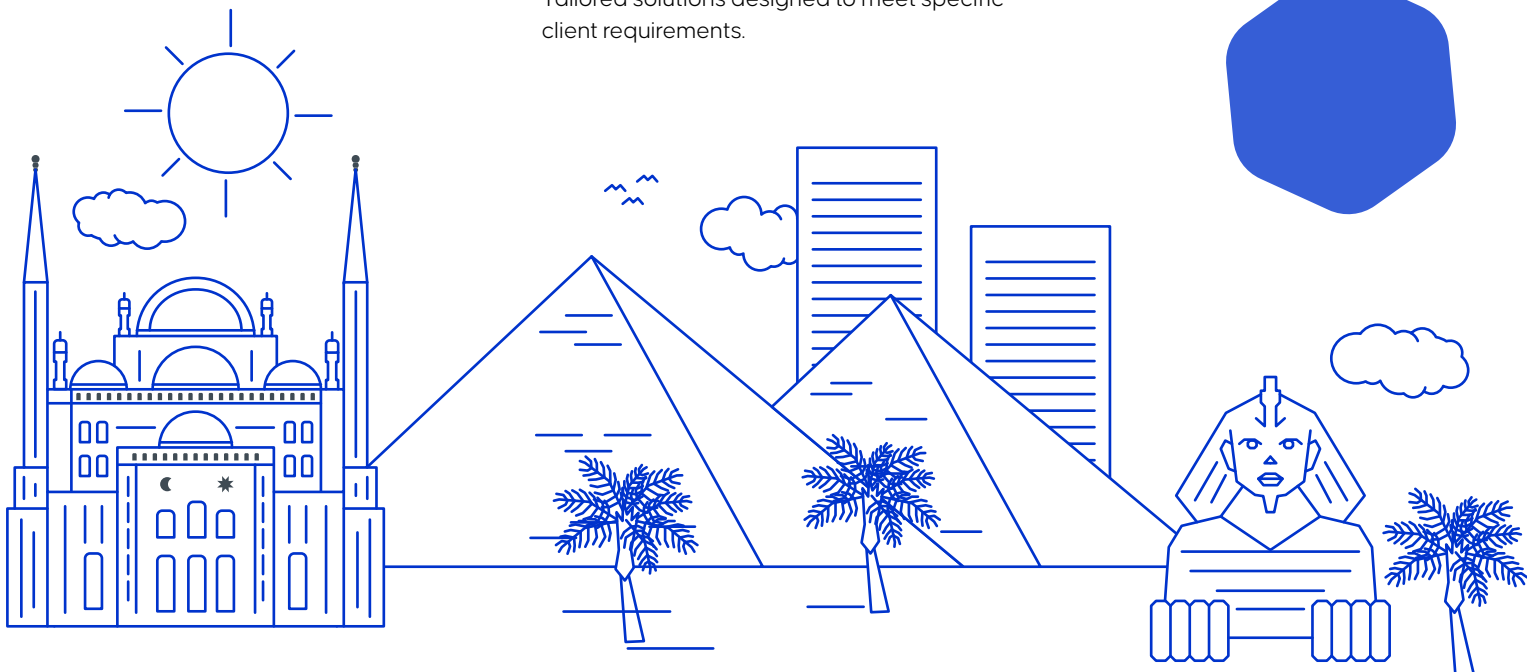

### Reliable & Scalable Systems

Future-ready systems that grow with your organization while meeting global standards.

### Customized to Client Needs

Tailored solutions designed to meet specific client requirements.

# OUR PRODUCTS

Precision timekeeping and automated bell systems that ensure accurate synchronization across facilities.

Smart queue management solutions that ensure smooth customer flow and reduced waiting times.

## INDOOR NAVIGATION & SMART WAYFINDING SYSTEM

**MawaqifNGo** is an advanced indoor navigation and wayfinding solution designed to help visitors seamlessly navigate complex indoor environments. The system provides intuitive, interactive, and visually guided routes to destinations such as stores, service zones, facilities, parking areas, and points of interest.

Built for high-traffic indoor spaces, MawaqifNGo combines intelligent route calculation, gesture-based map interaction, QR-code initiation, and multilingual support to deliver a smooth and accessible navigation experience across multiple platforms.

The solution is ideal for shopping malls, airports, hospitals, corporate campuses, public buildings, parking structures, and large commercial facilities.
